

# User Manual for 3D Water Steam Fireplace

## I Product Specifications

Product Name	3D Water Steam Fireplace		
Standard Dimension	100 / 120 / 150 / 180 / 200 x 25 x 20 cm		
Feature configuration	1.Water shortage reminder 2.Full water alarm 3.RF remote control 4.Touch screen key control 5.Water shortage protection 6. Short circuit protection		
Rated Voltage	220~240V	Frequency	50-60Hz
Power	100W	Atomization Method	Ultrasonic
Flame Color	Multiple colors	Plug Type	UK
Fuel	Purified water	Light source	Waterproof LED
Application	Decoration + Humidification	Control mode	Touch screen key control + Remote control
Add water method	Manual water filling	Working Hours	10-12 hours by full tank

## II Operation Instructions for Key Control

### 1.On/off Switch:

Please remove the rubber stopper on the water inlet, put on the funnel, and pour pure water into it. When there is some water, please turn on the fireplace and add water, when indicator light turns green, it could start work. If the light turns red during using, the fireplace needs to add water. If indicator light turns blue, the water is full, and there would be alarm, please don't add any water.

Indicator Light: Blue - Full Green - Enough Red - Lack of Water

### 2.Color Switch - Keep switching color keys:

C1-Red; C2-Green; C3-Blue; C4-Pink; C5-Purple; C6-Light blue; C7-Free color transformation

### 3.Flame Size Adjustment Switch:

The flame size could be modified in 6 levels, L1 is the weakest level and L6 is the strongest level, L2 is the default boot level.

### 4.Time Setting Control Switch:

The fireplace supports 1- 9 hours timing setting. The machine will turn off automatically when the time runs off.

### 5.Draining Operation:

Turn off the fireplace and connect manual drain water hose to water tank, press the hand pump to drain.Regularly clean the limescale on the atomizer to make it last longer.

## III Precautions

- 1.The installation environment, especially around the flame, is best sealed. There is no air-conditioning outlet or window, and it should not be placed near the door.
- 2.LED lights inside and manual drain water hose are designed to be waterproofed. Blankets, clothes, curtains,paper and other flammable products to be more than 1M from the air outiet.This product is not suitable for use in outdoor, bathroom, laundry room and other possible contact with water space.
- 3.This fireplace relies on the ultrasonic atomizer to make the flame. The water injected into the water tank is preferably pure water. Regularly clean the limescale on the atomizer to make it last longer.
